

**The City of Albuquerque's  
Pollution Prevention Program**

**presents**

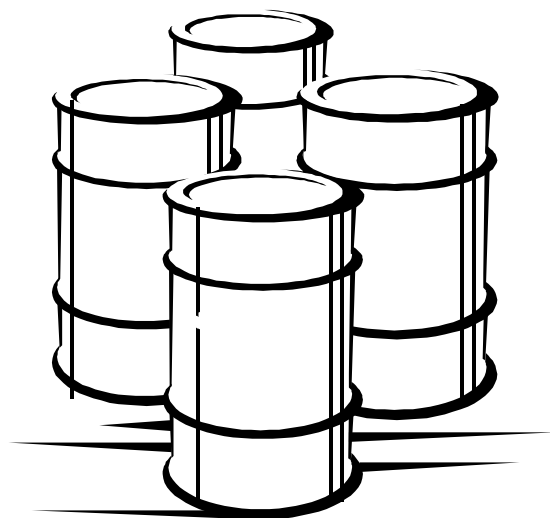

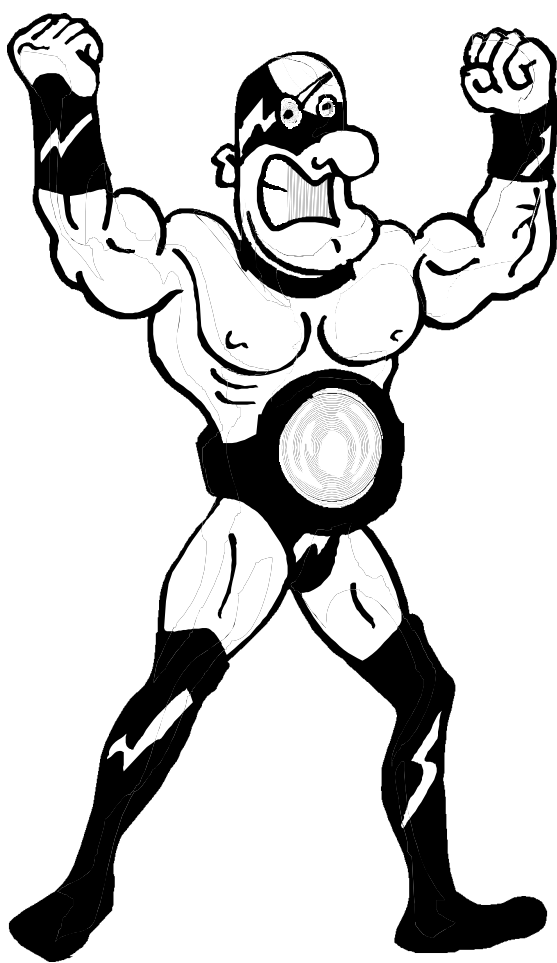

# **Pollution Prevention Avengers**

**Vs.**

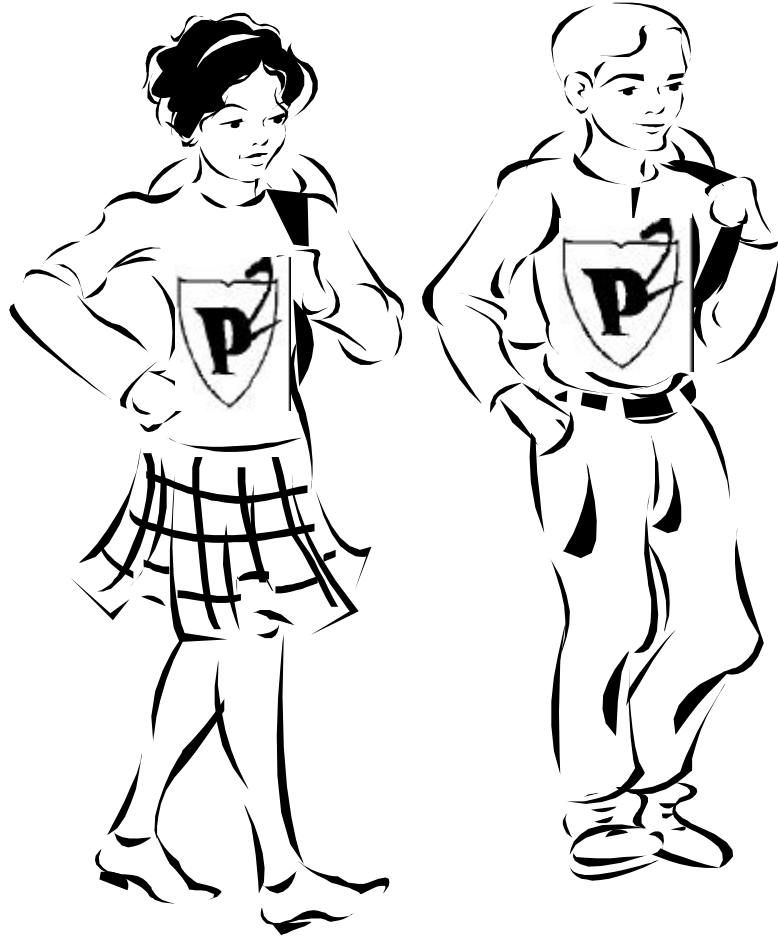

**Hazardous Harry**

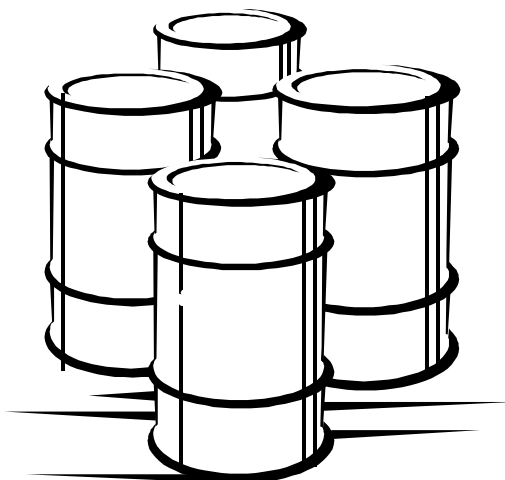

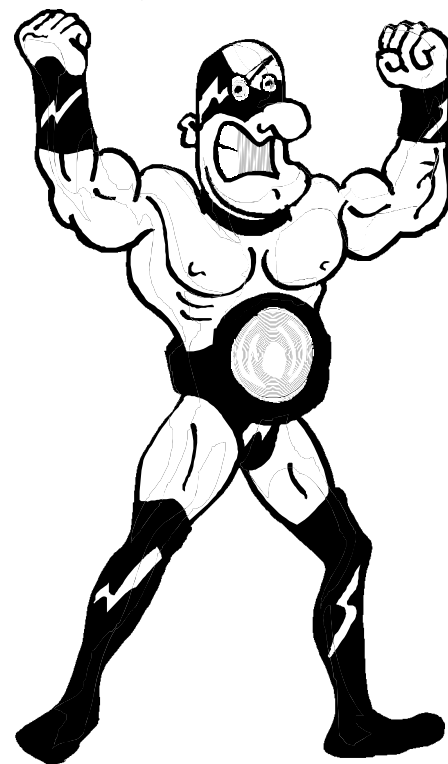

After I dump these chemicals down the drain, I will be one step closer to ruining the environment and nobody can stop me.

We can stop you, Hazardous Harry. We won't let you throw chemicals down the drain that can harm the environment.

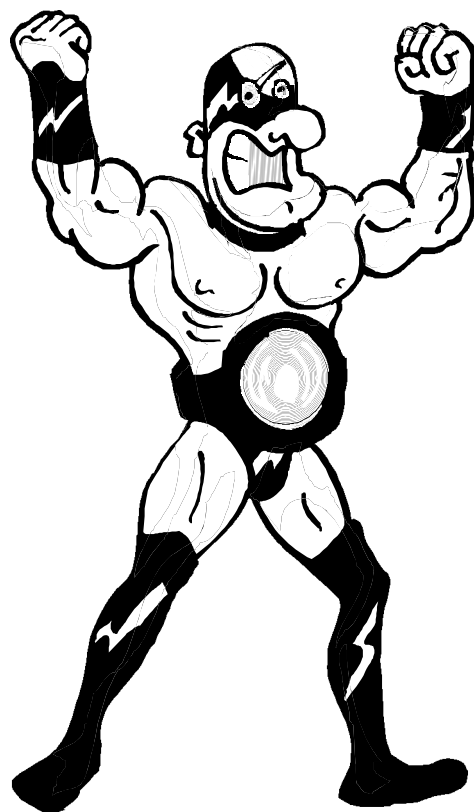

Oh no! It's  
the p2  
avengers.

Don't you know that you can take the chemicals to be recycled or you can call the people at the p2 Program if you don't know what to do with paint, cleaning products or other chemicals.

OK. I'll take them to be recycled.

Remember kids, everybody can be a p2 Avenger. All you have to do is remember not to dump any hazardous chemicals down the drain. If you or your parents have any questions about what to do with these materials please call the p2 Program at 873-7058 or 873-7059. Let's all try to keep our environment safe and clean.

Try to complete the maze through the drop of water.
